

List of Organizations Potentially Subject to Carbon Market in Carbon Pollution Accountability Act

Entities subject to carbon charges under the Carbon Pollution Accountability Act will be required to buy allowances if their emissions have exceeded 25,000 metric tons of CO₂e ([carbon dioxide equivalent](#)) annually at least once in the prior three years. Not all entities that appear on the current list are subject to the Carbon Pollution Accountability Act, and others not listed could be required to pay the carbon charge.

The list below shows entities with emissions that exceed 25,000 metric tons of CO₂e annually but does not indicate which ones will be required to pay carbon charges.

Data sources by type:

- Facility: [Washington's Greenhouse Gas Reporting Program](#)
- Transportation Fuel Supplier / Fuel Supplier: [Washington's Greenhouse Gas Reporting Program](#)
- Natural gas local distribution companies (LDCs): [EPA Greenhouse Gas Reporting Data](#)
- Electricity Importer: Electricity importers active on the West Coast were assumed to be potential importers.
- Potential fuel suppliers and electricity importers are best estimates.
- We anticipate that there are several organizations (mostly fuel suppliers and electricity importers) not on this list that will be part of the program. More information is necessary to identify them but is not currently available.
- This list was made using data from 2012 and 2013. Data from 2014 are not available until 2015.
